Heartscopes Installations

- A) Autonomous educative and creation tool: Unique tools and competences for multimedia installations, trainings and workshops.
- B) Autonomous "side stage": Modular equipment and amplification are onboard and can be powered from the van.
- C) Mobile sound recording and production studio.
- D) Stand alone mobile proximity sound installation: 15 to 25 inducer speakers breathe recorded or live sounds in the vans surfaces.
- E) Stand alone exhibitions in parks, towns, as in all places the van can reach:
- On site acoustic and analogue installations
  - Up to 30 recorded or live sound sources can spread from the van
  - Proximity Sound installations or multi diffusion
  - Up to 24/24h access with light scenography

The Van:

- 1) Bedroom / office / work station : Inside furniture is modular, multipurpose, and can be removed according to current tours and projects
- 2) Electricity is produced from the inside of the van with a new ecologically clean source. (Reliable: Quantity-Stability-Security-Silent)
- 3) Low pollution and fuel consumption (2013).
